

When Prevention is a Must - Salk: A Living Legacy

Richard Ledford
Editor

As an editor's observation, most of our meetings have a huge community service twist that resonates deeply with Rotarian values. Today's meeting really spoke to that value. But first, we had to wade through

Prez Peter and his rant about the origins of "The Best Club" slogan, and cover a lot of important information.

Chris Sichel, a Rotarian of considerable talents, offered up a very thoughtful Inspirational Moment. Chris covered significant events that had occurred on August 13, then really challenged us to give up those grudges that tend to cover up the true colors of life. Short advice: Get over them! The Prez then led us in the Pledge, with *America the Beautiful* led by the Club 33 Singers (did I mention the fabulous songfest they provided during the lunch meal?) and accompanied by Bryan Verhoye. The voice of Sometimes-Good-Jokes (and I mean sometimes) **Bert Wahlen** deposited all the news, this week sponsored by **Mel Katz** and Manpower. Prez Peter introduced our VIPs including Past District Governor Larry Scott, and of course, our visiting SDSU Rotaract students. Then Prez Peter also gave a shout out to sick **Dick Troncone** who is home resting now. Those who really know Dick are wondering what it took in the first place to put this undefeatable Rotarian in the hospital! Next up was **Cari McCormick** with a reminder of the Grotarian Poolside Chat on August 18.

Community health just doesn't happen by itself, and our club has many avenues of service that work toward both our local community and global community health.

Today, Prez Peter recognized our Don't Wait Vaccinate Committee led by **Amnon Ben-Yehuda**. Their amazing work was showcased in the August issue of the International Rotarian magazine. Of course, there was a price to be paid for such notoriety, which left Amnon \$500 lighter!

Legacy was in the air with **Cheryl Wilson** and Larry Scott bestowing a Paul Harris Fellow on Cheryl's son and fellow club member **Troy Wilson**. Nicely done! Our newest and obviously talented new members, **Joe Sammartino** and **Jeff Hill** were introduced and shared a little of their community involvement (which was a lot!). Our Chair of the Day was **Dr. Richard Coutts**, a noted bone doc, who is also an active member of the Don't Wait Vaccinate Committee.

Who better than Richard to introduce our speaker Dr. Peter Salk, a noted research scientist and son of the renowned Dr. Jonas Salk. Dr. Salk took us back in time, tracing his father's remarkable journey that led to the Polio vaccine. And a remarkable journey it was! In 1954 when the vaccine was introduced in the U.S., within 5 years Polio cases were reduced by more than 90%. Worldwide, only three countries are left with serious Polio epidemics. That legacy lives on as Dr. Salk continues his father's work at the Salk Foundation and the Salk Institute. With Rotary International's effort to eradicate Polio, this was truly a program that spoke to our values!

Can Mobile Technology Completely Transform Healthcare?

Remarkable advances in miniaturized computing power and connectivity over the last several decades have changed nearly every aspect of our lives, but they have yet to make a substantial impact on healthcare. However, mobile health (mHealth) technologies currently being developed are capable of enabling unprecedented changes in the manner and quality of clinical care available to the growing majority of the world's population with mobile connectivity. This presentation will review the great deal of ongoing work being carried out, much in San Diego, to establish the true capabilities and potential value of the evolving field of mHealth.

Dr. Steinhubl's research activities have covered a broad range of topics in cardiology with a primary early focus on trials of novel antithrombotic therapies for the treatment and prevention of cardiovascular disease, and more recently on the application of an integrated systems-based approach to the optimal identification, communication and treatment of an individual's risk for various manifestations of cardiovascular disease.
